About Lumen

Lumen Technologies is a global telecommunications leader that empowers organizations to drive growth by seamlessly connecting people, data, and applications with speed, security, and efficiency. Meeting the demands of next-generation technologies requires an advanced application delivery architecture, specifically designed to manage complex and data-intensive workloads. Lumen combines the talent, experience, infrastructure, and expertise of leading technology companies to address the dynamic data needs of modern applications.

Headquartered in Monroe, Louisiana, Lumen, formerly known as CenturyLink, offers a broad range of services, including high-speed internet, networking, cloud solutions, edge computing, content delivery networks (CDN), cybersecurity, and managed IT services. With a global workforce of approximately 28,000 employees, the company operates in over 60 countries, serving key industries such as healthcare, retail, education, and finance. Reporting an annual revenue of around \$17 billion, Lumen demonstrates a robust market presence. The company is focused on growth through significant investments in advanced fiber networks and edge computing to enable technologies like IoT, AI, and real-time analytics.
